# SAFE BUSINESS

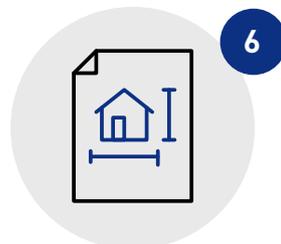

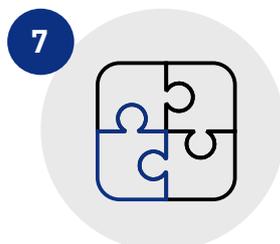

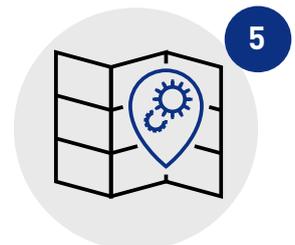

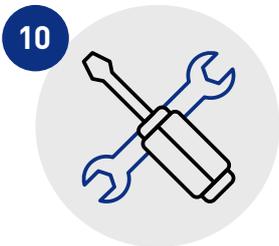

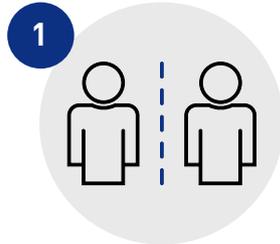

## MORE SAFETY FOR SUCCESSFUL BUSINESS

- Hygiene concept
- Information and recommendations for exhibitors and their partners

MADE BY

As the organiser, we are making every effort to ensure your safety during your visit to the trade fair grounds. We are therefore in close coordination with the responsible health authorities together with the operator, Deutsche Messe AG. With immediate effect and until further notice, the technical guidelines will be supplemented with protective measures concerning behaviour, distances and hygiene:

### Grounds-wide regulations and recommendations

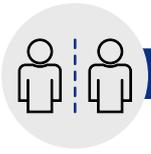

1. Behaviour at the grounds
2. General protective measures at the grounds
3. Registration, admission, payment
4. First aid
5. Traffic routes, communal areas, presentation areas

### Further information and recommendations for exhibitors and their service partners

6. Stand construction and stand design
7. Stand organisation
8. Catering and hospitality in stand areas
9. Contact tracking
10. Assembly and dismantling

As a visitor, exhibitor or service provider, please always observe the following points, which are necessary for the successful implementation of the protective measures. As the organiser, we reserve the right to make changes and adjustments.

# Grounds-wide regulations and recommendations

## 1. Behaviour at the grounds

- When entering and exiting the event and throughout the entire event period, all persons at the trade fair grounds are requested to adhere to a minimum distance of 1.50 m from one another, if possible ('minimum distance' in the following).
- In addition, a mouth and nose cover (MNC) should be worn in all closed rooms and buildings on the exhibition grounds. Likewise, in all places where the minimum distance can not be maintained.
- Please always observe the currently applicable hygiene regulations issued by the German Federal Centre for Health Education (greeting without handshake, coughing / sneezing into the crook of the arm, regularly washing hands, avoiding touching one's face).

## 2. General protective measures at the grounds

- The trade fair grounds in Hanover offer an outstanding infrastructure that already guarantees the highest of hygiene standards.
- When events are conducted, the cleaning frequency is additionally increased; entrance and exit areas, toilets, etc. are also disinfected several times per day.
- Disinfectant dispensers can be found in the entrance areas, in toilet facilities, at service points and in the forums and conference areas.
- Throughout the trade fair grounds, transparent partition walls made of glass and plastic will also be installed at counters at which contact between employees and service providers and exhibitors takes place (e.g. in the press centre, at the cloakrooms, at information points and in service offices).
- The catering areas will be extended with additional facilities outdoors. Takeaway food and drinks will primarily be on offer there.
- There will be fixed daily quotas of admission tickets in order to be able to limit the number of people on the trade fair grounds to a permissible maximum (as defined by the current Corona Ordinance).

### 3. Registration, admission and payment

- Under the current measures, prior registration of all persons is a prerequisite for entry to as well as stay on the trade fair grounds.
- Visitors can obtain their tickets in advance and online via the EuroTier/EnergyDecentral ticket shop. Each ticket is valid for one fixed day of the trade fair. No multi-day tickets will be issued.
- Visitors who wish to visit the exhibition on more than one day must register individually for each day.
- Exhibitors will continue to receive tickets for the entire duration of the trade fair. However, it may be necessary to specify attendance or days of use in advance, as the maximum number of persons for EuroTier/EnergyDecentral may be limited.
- To ensure social distancing regulation, people guidance systems and floor markings are used in the entrance areas.
- The admission ticket must be carried at all times during the visit, including when leaving the premises.

### 4. First aid

- If you feel unwell and present symptoms of COVID-19, please contact the medical centre (initially) by telephone:  
**Phone: +49 511 89-30030**
- The medical centre is located behind the glass transition from north entrance 1 to hall 20 (please follow the signs).

### 5. Traffic routes, communal areas

- The aisle widths in the exhibition halls have been adjusted so that the minimum distances can easily be maintained.

## Further information and conditions for exhibitors and their service partners

Due to the COVID-19 pandemic, you are obliged to observe the following points as a EuroTier/EnergyDecentral 2022 exhibitor.

Depending on the respective situation, the health authority is entitled to issue further orders, adjust orders that have already been issued or rescind them in their entirety.

Monitoring the conditions within the trade fair grounds and intervening immediately in the event of violations are the responsibility of the exhibitor.

The DLG exhibition management reserves the right to restrict or prohibit the operation of individual trade fair stands at any time in the event of contraventions.

### 6. Stand construction and stand design

During the trade fair, a distance of 1.50 m should be adhered to between persons. The exhibitor is personally responsible for ensuring that the applicable hygiene and behavioural measures are implemented and adhered to on its stand area.

The following regulations for stand construction have accordingly been established; as the exhibitor, you must take these into consideration in your planning and ensure them during your trade fair presentation:

- The trade fair stand should be designed in such a way that sufficient air exchange is ensured throughout the trade fair, particularly in meeting and other communal rooms, and that covered stand constructions are guaranteed (passive/ active ventilation).
- Internal stand traffic areas should be designed so that visitors and personnel can preferably adhere to the minimum distance.
- Plenty of space should be provided for spectators in the respective stand area for product presentations and show/ action areas. An adequately dimensioned spectator area should ensure that the traffic routes are kept clear.
- Meeting and communal rooms for personnel should be dimensioned so generously that there is sufficient space available.
- Interaction points (counters etc.) should be positioned so that sufficient space is available on the stand for visitors. If the minimum distance between two persons can understandably not be adhered to at interaction points, suitable constructive measures must be implemented (spit guard).
- Contact areas should consist of smooth, easily cleaned surfaces.
- Sufficient disinfectant should be provided at the stand for the exhibitors' employees and service partners.
- Additionally, offering visitors the option of disinfecting their hands, e.g. by providing disinfectant dispensers, is also recommended (bookable online in the exhibitor service portal).

## 7. Stand organisation

- Wearing masks should be recommended when performing shows or actions with a targeted high audience impact.
- Products may continue to be presented in the context of demonstrations subject to adherence to the hygiene regulations.
- Highly-frequented areas and frequently used contact areas, such as tables and counters in catering and sales areas, should be disinfected regularly; the stand should be thoroughly cleaned at least once per day.
- We recommend offering mouth and nose protection and hand disinfectant for visitors to the stand.
- Evening events at this year's EuroTier/EnergyDecentral are possible after registration with the DLG and in compliance with the currently valid hygiene regulations.

## 8. Catering and hospitality in stand areas

- We recommend that food be given out packaged whenever possible; portion packs should also be provided for sugar, salt, pepper shakers, sauces, etc.
- If you are planning a catering area, we recommend engaging a professional caterer. Caterers are obliged to adhere to all hygiene regulations.
- Plate and cutlery service: Please use either packaged disposable cutlery or machine-washed reusable cutlery.

## 9. Contact tracking

We recommend the installation and use of the German Corona-Warn App during your stay at the EuroTier/EnergyDecentral 2022 trade fair grounds.

## 10. Assembly and dismantling

The general regulations of the latest version of the German Lower Saxony Ordinance on Infection Protection Measures to Halt the Spread of the Coronavirus, as well as the SARS-CoV-2 Occupational Health and Safety Ordinance (Corona-ArbSchV) also apply throughout the assembly and dismantling phase as a supplement to the Technical Regulations.

Specifically, the following points must be observed:

- We recommend keeping a minimum distance of 1.5 metres between people during all work. If this is not possible, technical measures (spit shields) or mouth-nose protection should be used.
- Small, fixed teams are to be formed during the activity as well as during travel to and from the venue in vehicles and during breaks, if possible.
- All employees must be informed of the SARS-CoV-2 work safety standards. It must be ensured that all employees have understood the instructions.
- This particularly applies to the distancing and hygiene regulations, i.e. greeting without hand shake, coughing and sneezing into the crook of the arm, regularly washing hands thoroughly.
- Smoking is prohibited in the trade fair halls. If possible, breaks should always be taken in the open air.
- Accommodating employees in single rooms is recommended. Collective accommodation should be avoided.
